Forecast for Saturday 13 Feb 2021

Weather: Staying dry overnight but cloud amounts continuing to increase. Then a dry, quite bright start, but largely cloudy and cloud will thicken and lower in morning to bring outbreaks of snow by the afternoon. Perhaps some heavier snow in west and possibly blizzard conditions, before snow fizzles out through the afternoon. Then a mostly dry evening with some breaks in the cloud, leaving a few clear spells.

Chance of cloud free mountain/hill tops above 600m: 90% to start but falling to 10% in snow by the afternoon. Chance improving to 40% in evening.

Visibility: Good at first, but falling moderate or poor in snow and very poor at height with extensive cloud and bases dropping to 400-500m. Cloud more broken and occasionally above summits in evening

Meteorologist's View

A severe chill expected, even at lower levels

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
15:00 on Fri 12 Feb 2021	0mm	0mm	0mm

Forecast for Sunday 14 Feb 2021

Weather: Mainly dry but cloudy overnight and temperatures rising. Rain arriving from west around daybreak, perhaps falling as snow on the tops at first. Rain will become heavier and more prolonged through the morning with a thaw of snow from lower and some mid-levels leading to risk of flooding and fast flowing water courses. Rain clearing in evening and some clear spells developing along with mist and fog in places.

Maximum wind: South to southeast 35-45 gust 55 mph turning southwest 30 gust 40 mph later

Chance of cloud free mountain/hill tops above 600m: 40% at first, but almost no chance from mid-morning

Visibility: Good at first, then poor or very poor with extensive cloud down to 400m. Improving moderate or good in evening, but poor or very poor places with mist and fog.

Temperature: **Valleys:** Zero rising to plus 3 C overnight then to plus 7 C
At 600m: Minus 2 C soon rising to plus 2 C
Freezing level: Rising to 500m overnight then well above the summits through the morning
